

Multi-Wall panels have all the standard property performance you would expect from multi-wall polycarbonate; heat resistance, high light transmission, great impact, and hail resistance. High thermal insulation values are another feature and it also comes with a 10 year warranty against yellowing and hail. This incredible glazing material is ideal for greenhouses, solariums, atriums, skylights, patio covers, pool covers, walkways, and point of purchase applications. The panels are light weight and easy to install.
